

Final Project Pitch Presentation

CS-546 – WEBPROGRAMMING

What is the project pitch presentation?

- Your group will give an in-class non-technical presentation detailing what your product is, who the user would be, and why the project is worthwhile to take on.
- You will go over the core features of the project as well as the extra features you would like to implement if there is time
- Presentation should be 7-10 minutes (no longer than 10 minutes) and should not be very technical but should highlight the key functionality of your application, think of this as pitching your product to investors.
- Each group member must speak
- Must be business casually dressed

The Project Pitch Presentation

- Each group will give me a print out of their presentation on the day they present, I will use these to write notes to myself about your presentation for grading.
- Be prepared, have your part and slides memorized!
- All slides should be consistent with the same style of each slide, same font, same font size from slide to slide etc..

The Project Pitch Presentation Rules

- On presentation days **ALL** students must be present in class for the entire time presentations are going on. If a student is absent on **ANY of the presentation days or leaves early**, then 20 points will be deducted from that student's presentation grade for each presentation day they do not attend. (So if you are absent for 2 of the 3 days that would be a 40-point deduction)
- Be respectful of your fellow classmates that are presenting, pay attention to their presentations, do not talk during presentations etc..
- Use of electronic devices is not allowed during presentations out of respect for your fellow classmates who are presenting. No using phones, computers, etc while others are presenting.
- Try not to leave the classroom while a group is presenting (it's a distraction). If you need to use the bathroom, get a drink of water etc.. Please wait until we are in between presentations. If you leave the classroom and there is a group presenting when you come back, you must wait outside until the group is finished, then may re-enter the classroom

The Project Pitch Presentation

- Points will be deducted for:
 - Not being dressed in business casual attire
 - Not being prepared (reading word for word from the slides, staring down at your notes the entire time)
 - Going over 10 minutes
 - Your slides not having the same look and consistency
 - Not being respectful of your fellow students who are presenting
 - Not being present on all presentation days
 - Not having a clear and cohesive presentation
- Breathe and just chill.. Everything will be alright. 😊
